SURGICAL CROWN LENGTHENING

EVERYTHING YOU NEED TO KNOW.
HANDS-ON AND LIVE CASE.

23-24 OCTOBER 2026

Instructors:

- Stavros Pelekanos
- Venci Stankov

09.30-11.00	Lecture: Biological principles and aesthetic considerations in crown-lengthening procedures. Clinical objectives for optimal healing, patient comfort, and smile integration. Emphasis on the importance of interproximal soft tissue management.
11.00-11.30	Coffee break.
11.30-13.00	Lecture: Decision-making: flap vs. flapless approaches. Step-by-step crown-lengthening techniques, including gingivectomy, osteotomy, and osteoplasty.
13.00-14.30	Light lunch.
14.30-15.00	Introduction to Live Surgery: Preparation and demonstration of live surgical techniques.
15.00-17.00	Live Surgery: Surgical crown-lengthening procedures in the esthetic zone.

DAY 1

09.30-11.00	Lecture: Key factors in crown lengthening procedures – exploring complex cases, integration with prosthetic treatment, and the application of digital planning and surgical guides.
11.00-11.30	Coffee break.
11.30-13.00	Lecture: Approaches to complex clinical cases – decision-making and timing considerations for successful outcomes.
13.00-14.30	Light lunch.
14.30-15.00	Hands-on Introduction: Step-by-step demonstration of surgical crown lengthening techniques.
15.00-17.00	Hands-on Session: Practical training on surgical crown lengthening in the esthetic zone using porcine models. Participants will practice flap management, osteotomy, osteoplasty, tooth exposure, and suturing techniques.
